

# SCIENCE OLYMPIAD TEST PACKET DIVISION C

These sample test questions and results have been reproduced to help new coaches, veteran coaches and new supervisors get some idea about the kinds of questions which have been used at regional, state and national competitions. This packet is also an attempt to reduce any advantage that only teams attending national tournaments or seminars may have had. These materials are copyrighted and may not be reproduced to share with other educators. They are meant for the sole use of the school that purchased them.

## Table of Contents

Astronomy .....	1
Bottle Rocket .....	6
Chem Lab .....	7
Compute This .....	13
Designer Genes .....	16
Disease Detective .....	26
Dynamic Planet .....	32
Experimental Design .....	39
Fermi .....	43
Fossils .....	44
Mission Possible .....	57
Physics Lab .....	61
Polymer Detective .....	66
Practical Data Gathering .....	69
Qualitative Analysis .....	71
Remote Sensing .....	73
Science Of Fitness .....	79
Storm The Castle .....	86
Tower Building .....	87
